

# Work Management for Health Organizations

Health organizations are under pressure to provide better and safer care and services to more patients in less time and at a lower cost. At the same time they are obligated by government mandates and requirements for governance and transparency. Their Project management offices and IT departments are challenged with mounting requests for services, systems, and facilities while budgets remain constrained.

The SharkPro Projects Work Request Framework is an enterprise-wide business request framework integrated with a proven project and portfolio management solution powered by Microsoft® SharePoint and Project Server 2010. SharkPro Projects Work Request Framework is designed to help health organizations capture ideas and requests, align resources and investments with business priorities, gain control across all types of work, and report performance.

## Prioritize, align, and execute effectively

- Capture ideas and requests from users across the enterprise
- Dozens of built-in requests for services, enhancements, procurements, etc.
- Simple web-based navigation for non-expert users and executives
- Clear and transparent request evaluation and approval process
- Focus resources on the most relevant and important projects
- Visualize performance using powerful dashboards
- Quickly generate dozens of built-in and customized reports
- Leverage Microsoft Project, ERP, and Health solutions
- Immediate enterprise-wide demand management
- Increased management visibility
- Better team collaboration and productivity
